## PROJECT

---

### Intelligent Food Advisor – AI-Based Recommendation System

Final Year Project • February 2025 - September 2025

- Built an AI-powered food recommendation system that suggests the best meal options based on user preferences and dietary constraints. Implemented machine learning techniques for prediction and used Python, basic ML libraries, and a simple database to store user data. Focused on improving recommendation accuracy, user experience, and applying AI concepts in a real-world scenario.

### Hotel Management System – Academic Project

April 2024 - May 2024

- Developed a web-based Hotel Management System using HTML, CSS, Tailwind CSS, JavaScript, and SQL database. The system included room booking, customer management, and a fully responsive user interface. Implemented CRUD operations for rooms and customers, with focus on clean design, smooth workflow, and practical learning of front-end and basic database integration.
